Hardy-Weinberg Practice Problems – ANSWER KEY 1. You have sampled a population in which you know that the percentage of the homozygous recessive genotype (aa) is 36%. Using that 36%, calculate the following: A. The frequency of the "aa" genotype (q²). q² = 0.36 or 36% B. The frequency of the "a" allele (q). q = 0.6 or 60 % C.

AP Biology Hardy-Weinberg Practice Problems ANSWER KEY

In this case, 100% of the F1 individuals would be pink! This is an example of "incomplete dominance," where both alleles contribute to the outcome. In some cases of incomplete dominance, both alleles might contribute equally so one allele would produce red pigment and the other white; thus, a pink plant appears.

MENDELIAN GENETICS PROBLEMS AND ANSWERS

Review the processes and principles behind living organisms and their ecosystems through exam prep practice questions on scientific inquiry and models in Albert's AP Biology prep course. Investigate the exceptions to Mendel's laws, including sex-linked traits, non-nuclear inheritance, codominance, and incomplete dominance.
