To use Chrome, it is mandatory to have the driver executable. To download the driver executable, visit the Selenium website. In the third-party driver browser section, one can

Selenium & Java Tutorial : How to run Automated Test | BrowserStack

Randoop generates unit tests using feedback-directed random test generation. This technique pseudo-randomly, but smartly, generates sequences of method/constructor invocations for the classes under test. Randoop executes the sequences it creates, using the results of the execution to create assertions that capture the behavior of your program.

Randoop: Automatic unit test generation for Java
