Aug 27, 2015 · The loss of pond water due to evaporation and trees rarely exceeds 12 inches, even during the driest month. Water-level reductions in excess of this amount would be indicative of a pond leak. If the pond level drops for an extended time due to drought, the exposed sides may dry and crack, causing pond leaks when the pond refills. Finding a Pond

Etymology. The word "animal" comes from the Latin animalis, meaning 'having breath', 'having soul' or 'living being'. The biological definition includes all members of the kingdom Animalia. In colloquial usage, the term animal is often used to refer only to nonhuman animals. The term "metazoa" is from Ancient Greek μετα (meta, used to mean "later") and ζῷα (zōia, plural of ζῷον

Taxonomy. Within the family Accipitridae, the Eurasian sparrowhawk is a member of the large genus Accipiter, which consists of small to medium-sized woodland hawks. Most of the Old World members of the genus are called sparrowhawks or goshawks. The species' name dates back to the Middle English word sperhawk and Old English spearhafoc, a hawk which hunts sparrows.
